NURSING RESEARCH

INDEX TO VOLUME 17 **JANUARY TO DECEMBER 1968**

Beginning with this volume no. 17, 1968, the annual index will be published separately and mailed with the last issue of the year. Extra copies are available upon request.

This index is in two sections: the first is an index to **Articles, Briefs, Research Reporter,** and **Researcher's Bookshelf** and the second is an index to the **Abstracts.** Both sections are arranged in two parts, subject and author. The subject parts are arranged alphabetically by author, subject, and location of the institution or agency in which the study was made. That is, a study on the geriatric aspects of psychiatric home care program in Canada would have entries under AGED, HOME CARE SERVICE, PSYCHIATRIC NURSING, and CANADA. The author parts are alphabetical by surname of author. The page number is indicated after each entry and in the **Abstract Index** it is immediately followed by the number of the abstract, for example 95(58). The following abbreviations are used: (ed)—editorial; (bk rev)—book review; (exc)—excerpt; (RR)—Research Reporter.

Note that the subject headings are the same as those used in the **International Nursing Index** and are based on the **Medical Subject Headings** published by the National Library of Medicine. A "Nursing Thesaurus," which appears each year in the first and fourth issues of the **International Nursing Index,** was compiled to help the user bridge the modification in style from the subject headings formerly used in the nursing indexes to those used in the **International Nursing Index** as well as in the annual indexes of **Nursing Research, American Journal of Nursing,** and **Nursing Outlook.** Copies of this Thesaurus are available upon request from the American Journal of Nursing Company.
